Terms and Definitions

- **Reach**

The number or percentage of different people who have seen 'x' minute(s) of a program or timeband.

Industry standard bases Program Reach on 5 consecutive minutes viewed.

- **Effective Frequency**

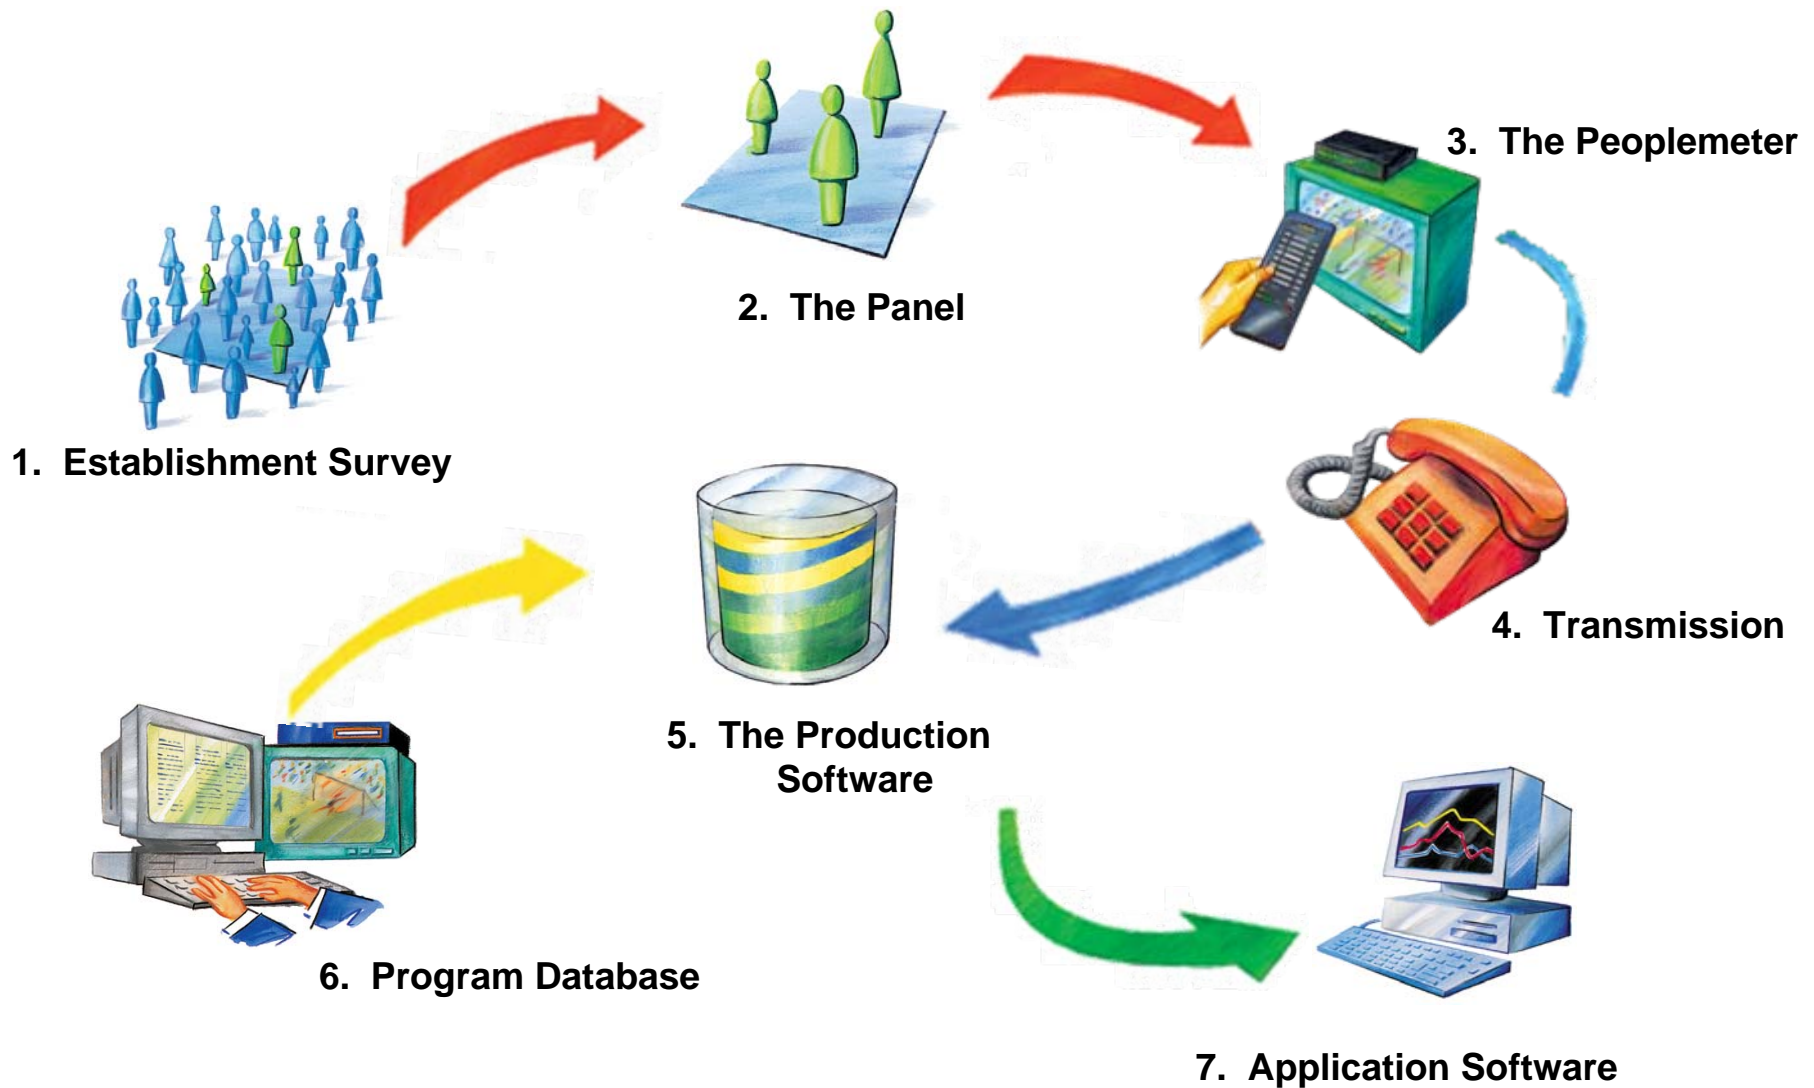

The number of exposures (1+, 2+, 3+ etc) deemed necessary for an advertising message to produce an effect

(i.e.. For the target market to take the desired action, or for the ad to cause the desired response)

- **Effective Reach**

The number or percentage of the target audience who are reached at, or above, the Effective Frequency level.

Eg. If the Effective Frequency is set at 3 and 55% of the target have seen the advertising campaign 3 or more times then the Effective Reach is 55%.

The Ratings Process

1. Establishment Survey

A large-scale annual survey conducted to define the population to be represented and its characteristics.

Panel homes are recruited from the respondents.

2. The Panel

Panel homes are selected according to a statistical design using information collected from the Establishment Survey and the ABS, guaranteeing the panel represents the Australian TV audience.

3. The Peoplemeter ...

A peoplemeter is installed on every TV set in each household.

It records and stores four pieces of information:

- ✓ Time
- ✓ Whether the TV set is on or off
- ✓ Channel tuned
- ✓ Persons viewing

The Ratings Process

4. Transmission

Every night, the data stored in the peplemeter is retrieved automatically via telephone using AGB Nielsen Media Research production software.

5. Production Software

"Pollux" performs the collection, processing, validation, weighting and final production of the household data into an individual by individual (unidentified), minute by minute database delivered overnight 365 days of the year.

6. Program Database

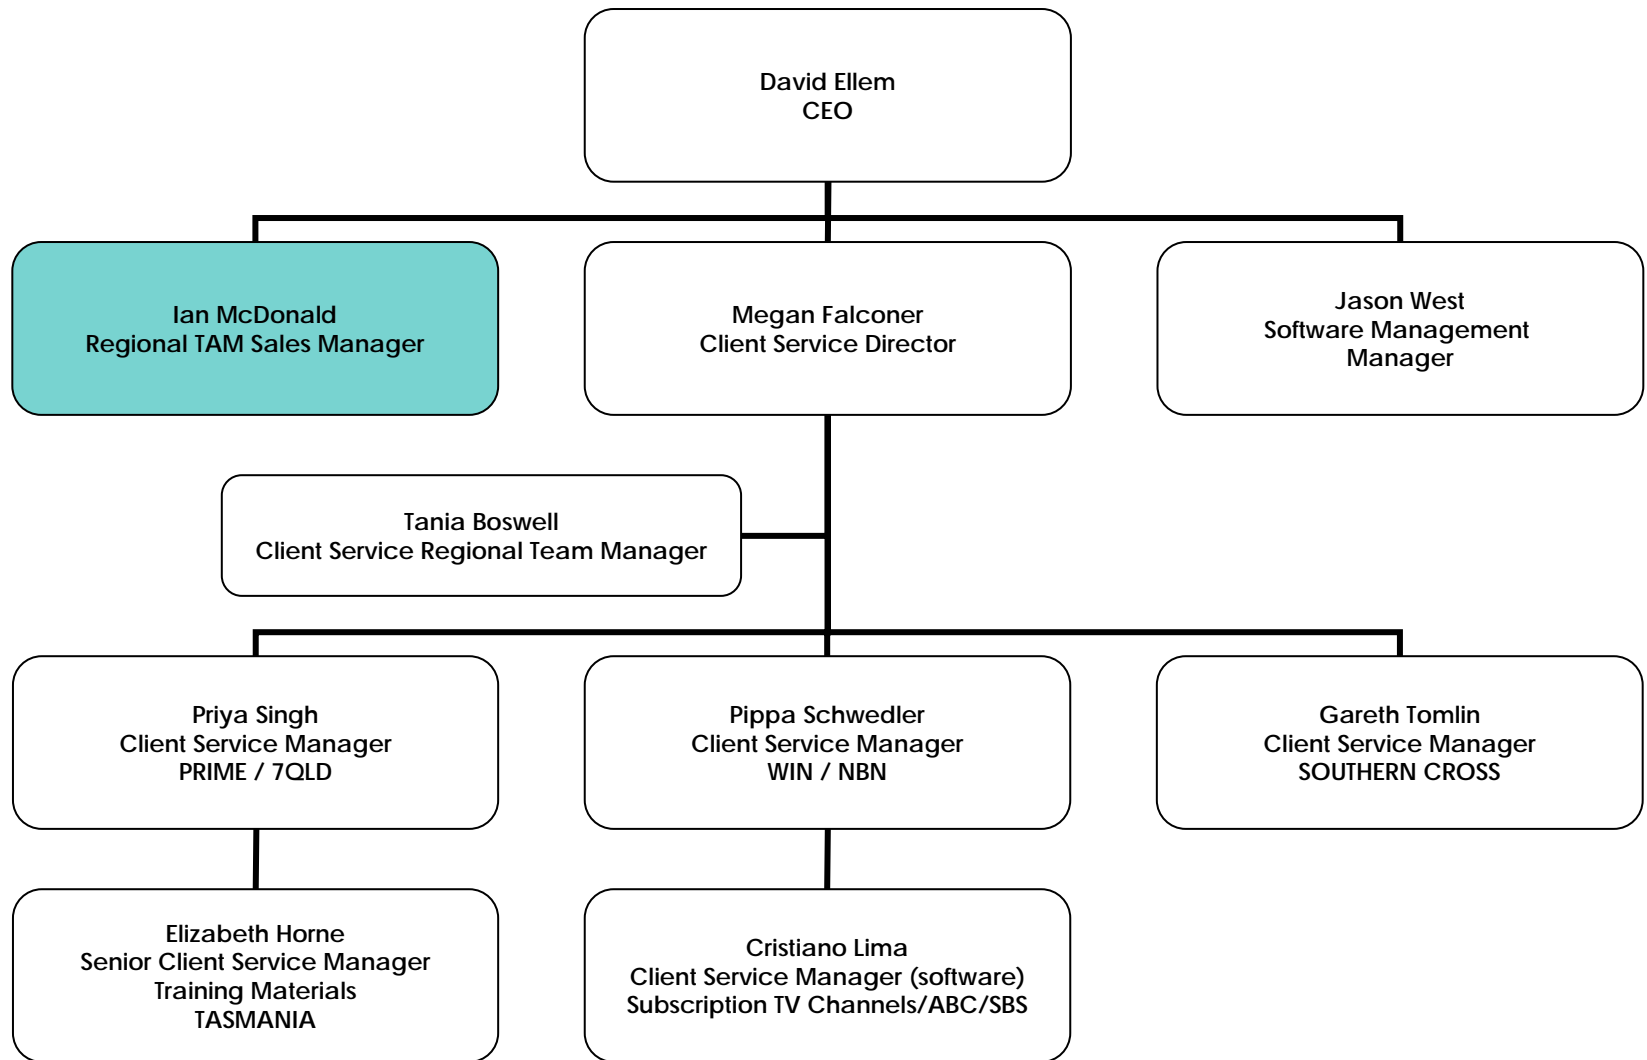

Using broadcast logs provided by the networks, a program database is built and fed into Pollux for integration with the viewing data.

7. Application Software

Each morning users download the complete database from AGB Nielsen's Media Research secure website. These users can then perform complex data analyses using application software such as "Arianna".
